

FRUIT ORCHARD PROTECTION SYSTEM

APPLE & PEAR ORCHARD

PROTECTION SYSTEM FOR APPLE & PEAR ORCHARD WITH TRELLISING SYSTEM

Apples and Pear are greatly impacted by environmental conditions and hence requires a tailored designed structure that answers to all the problems for successful Orchard Cultivation.

SHIELD YOUR CROPS AGAINST

- Excessive rainfall
- Temperature fluctuations
- Hail
- Frost
- Strong winds
- Pests
- Sunburn

SHADE NETTING PROTECTION SYSTEM

Our Shade Netting System is designed to protect Apple and Pear from harsh weather conditions while creating a perfect growing environment.

- The Nets are made of HDPE and contain anti-oxidant additives
- Shade Nets are transparent or coloured and allow for a low level of shade of about 7-10% or according to requirements
- It has reinforced margin edges which eliminate yarn displacement
- Woven in ultramodern plants with high-quality U.V. stabilizers
- Strong, Durable lockstitch technology that resists Tearing, Stretching and Sagging
- Prevent Net unraveling or laddering even when punctured
- Easy handling and light weighted

BENEFITS FROM EFFICIENT NETTING SYSTEM

- Temperature regulation by Shade Nets
- Protection from Hails
- Protection System as Wind breaks
- Prevention from Sunburn, Sun scalding, Sun scorching
- Protection from Skin Russeting
- Prevent Fruit Cracking
- Avoid premature Fruit drops
